

FERTILIZER PLANTERS 13A

Planter and fertilizer applicator:

Not suitable for no-till, a product designed not to harm ergonomics in use, produced with high quality components selected especially for the proposed purpose.

The differential of this machine is the deposit of the STAINLESS STEEL FERTILIZER which gives the product greater resistance and durability.

This model is equipped with a 2mm thick and 7.4cm wide steel plate tip for perfect drilling in the soil; it also has an internal fertilizer and seed separator, suitable for planting in ploughed land. Volume in cubic meters of the box with 2

units: 0.0404m³
