

HIGH TECHNOLOGY FOR FAMILY AGRICULTURE

Transmission Adjustment: by a combination with sprockets, the sprockets are fixed in the easy place in the frame.

Depth Planter Control: helps in a quick adjustment to the planter

Fertilizer Feeder Mechanism: mechanical Carrier rotor type feeder with self cleaning milimetric adjustment, initiated by worm screw

Seed sowing: the seed sowing system is thought two mismatched disks mounted in "V" shape with 13" and 14".

Individual Fertilizer Bin: made in high – density polyethylene anticorrosive, high useful life for the equipment.

Cover mechanism: two rubber wheels for depth control and 3rd compactor wheel.

Seed Distributor: by disks with selected hole offering precision and efficiency.

Option: Two small disks, system for cover up the row, with compactor and depth control by 3rd wheel.

Seed Bin: polyethylene bucket type for thick grains, with 25 kg capacity per row.

Option: Two metal wheels in "V" shape for depth control with angle adjustment to cover up the rows. With 3rd compactor wheel.

Operation access platform: rear platform providing perfect operation and supply conditions.

Option: Two metal wheels in "V" shape for depth control with angle adjustment to cover up the rows.

EXCLUSIVO
PULA PEDRA
SISTEMA

Feeling the need of several producers who cultivate rocky lands, VENCE TUDO has developed the most efficient penetration and ground attack system. Baptized and patented "stone Jumper" a simple name which exemplifies in a practical way it is essential operation to a uniform and much more efficient planting, ensuring better germination and significantly avoiding breaks and stops, common in these soil situations, reducing time and costs in the plantation process.
